## 1. Package features

This package contains these following extensions:

- Joomla Template: BJ Synergy Free version
- Documentations
- Terms & Conditions

## 2. BJ List Menu Module

BJ List Menu is an extension used to display your main menu in a drop-down style. This module is packed with BJ Synergy Pro only. Please purchase BJ Synergy Pro through [http://clients.byjoomla.com/browse\\_products.php?category\\_id=1](http://clients.byjoomla.com/browse_products.php?category_id=1)

This is how your main menu looks when using BJ List Menu:

Figure 1. Sample BJ! List Menu style (1)

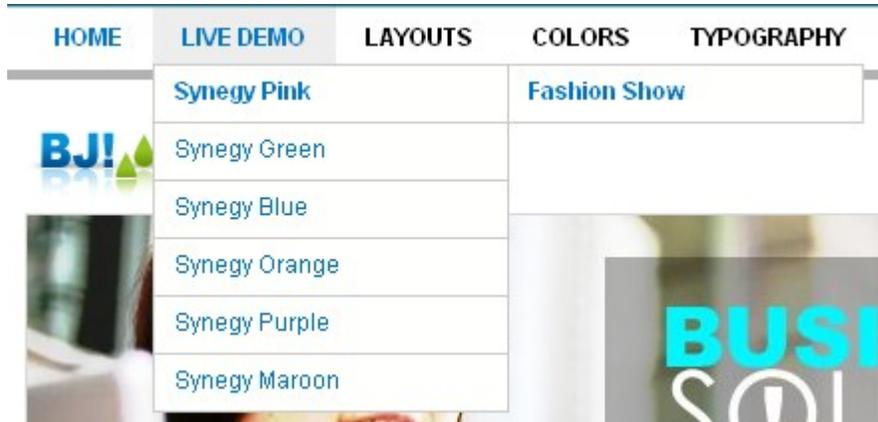

Figure 2. Sample BJ! List Menu style (2)

BJ! List Menu will display your main menu in a Flat-List style. The style of your toolbar is defined in *bj\_dropdownmenu.css* file which is embed in each Joomla! Template designed by BYJOOMLA.

## 3. BJ NewsTabber Module

BJ NewsTabber Module is a module which is embed in BJ Synergy Pro package only. It helps you to show news in a tabber-style, as you can see in our demo page. Please purchase BJ Synergy Pro through [http://clients.byjoomla.com/browse\\_products.php?category\\_id=1](http://clients.byjoomla.com/browse_products.php?category_id=1)

<a href="#">Download free</a>	<b>Pro Pack</b>	<b>Dedicated Support</b>	
-------------------------------	-----------------	--------------------------	--

	<b>Free 1.0 Joomla! BJ Synergy</b> BJ!'s Synergy is a multi-functional Joomla! template that is suitable for many purpose. The design is clean and tidy with the combination of <a href="#">Image slider</a> that will make your site looks more professional. Moreover, your use will be maximized as there are 6 colors availables.
---	--

**Figure 3. BJ! NewsTabber looks and feels**

You can find how to configure this module's parameters in *Module Configuration* section.

#### **4. BJ! Synergy Template**

BJ!'s Synergy is a multi-functional Joomla! template that is suitable for many purposes. The design is clean and tidy with the combination of [BJ! Image slider](#) that will make your site looks more professional.

When purchase BJ!'s Synergy Pro, the template has 6 colors theme, those are: Blue, Pink, Green, Purple, Maroon, Orange. You can see how it looks at our [Live demo](#) page.

You can purchase **BJ Synergy PRO** which is much more powerful compared with free version. Here is at least **9 benefits** you get when buying the PRO version:

1. 5 more template colors variation
2. BJ News Tabber Module embeded
3. BJ List Menu embeded
4. Marvelous typography embeded

5. Template layout is much more flexible
6. 1 more special module position
7. PSD source template design embbed
8. Sample data script
9. Dedicated support

BJ Synergy PRO is licensed under the commercial proprietary license in 2 options:

**Single Domain License:** You are allowed to use the product only on **single** domain, belonging to either you or your client. This option is good if you are planning to use BJ Synergy PRO only on 1 website / domain.

**Unlimited Domain License:** You are allowed to use the template on **unlimited** domains, belonging to either you or your client. This option is perfect if you want to deploy BJ Synergy PRO to your clients' websites.

You can upgrade from Single Domain License to Unlimited Domain License anytime by paying only the difference in price. Instruction about how to upgrade license can be found in **readme.txt** file accompanied in download package.

#### 4.1. Configure template

To configure BJ! Synergy template, do as the followings:

- In Joomla 1.0.x Administrator, go to Site → Template Manager → Site Templates to open *Template Manager* page.
  - o Choose *bysynergy* template, then click *Edit HTML* button to open *Template HTML Editor* page.
- You will find this piece of code in the editor. Change the value of each parameter according to the description.

```
$colors = array("blue","green","maroon","pink","purple","orange");

/* ===== CONFIG TEMPLATE =====
===== */

$template_color = $colors[0]; // Change color index here
$show_site_tools = 1; // To disable site tools, change the value to 0

/* ===== END CONFIG =====
===== */
```

Figure 4. Configure BJ! Synegy template in Joomla 1.0.x

- In Joomla 1.5, go to Extensions → Template Manager:
  - o Chose BJ\_Synegy template from the list, then click Edit button
  - o At the right panel, there are parameters of the template. Change it to whatever you want.

#### 4.2. Solutions for IE6 Transparent problem

Although IE8 was released many months ago, a lot of users still uses IE6 as their default browser. That would raise a problem with transparent images likes below figures:

Figure 6. Transparent bug in IE6

Figure 7. Transparent bug in IE6 fixed with BJ! Synegy

BJ! Synegy can help to solve this issue. But it need you to do one easy step:

- Copy **transparent.gif** image (which is attached to BJ! Synegy package) and paste it into root folder of your website (normally it will be at the same folders with Joomla! files such as: COPYRIGHT.php or LICENSE.php...

That's all. Now your website is ready to be viewed by any browser in any version.

## 5. About BJ! Image Slider

BJ! Image Slider Free version is ready now. Please take a look at the comparison between BJ! Image Slider Pro & Free version. You could purchase BJ! Image Slider Pro version [here](#).

BJ! Image Slider helps you to present your images in an attractive way. You can see how it works in our [Live Demo](#) page.

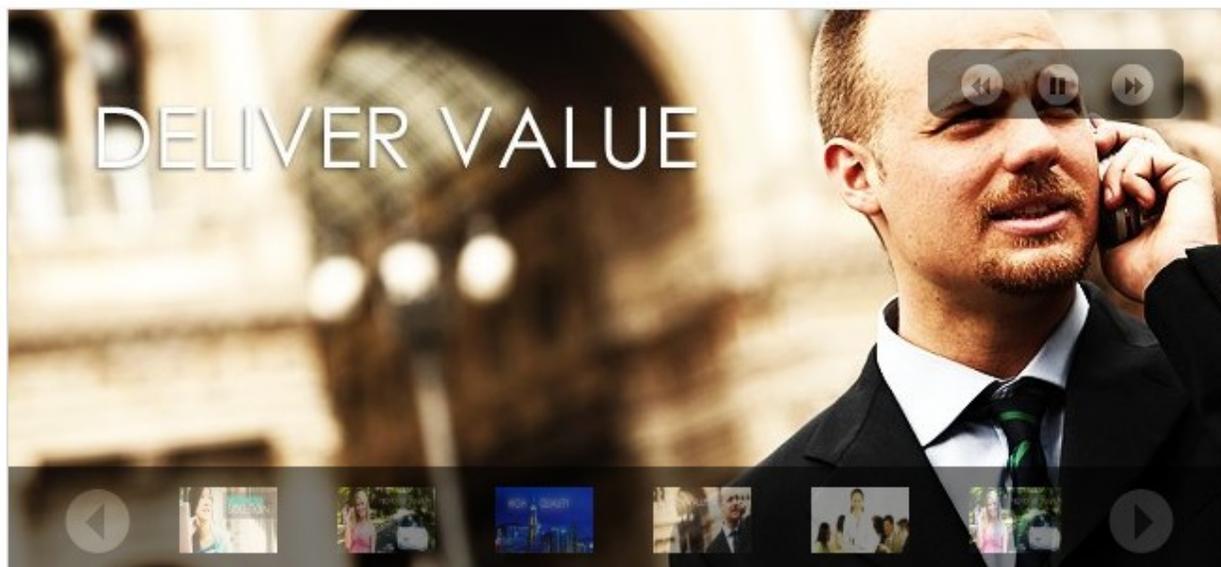

Figure 8. BJ! ImageSlider looks and feels

BJ! Image Slider contains one component, which is used to manage images, and one module used to present the slideshow.

Please note that, the module only works when the component is installed. One important thing is that, if you re-install the component, all of your previous configurations will be deleted (includes categories, images).

## 6. Purchase Pro version to install the sample Data

This feature is only supported when you purchase Pro version. Unless, please click here: [http://clients.byjoomla.com/browse\\_products.php?category\\_id=1](http://clients.byjoomla.com/browse_products.php?category_id=1)

To install sample data, please be sure that these following conditions have been met:

- \* Please make sure you are going to install sample data on a new fresh Joomla! installation.
- \* BJ! ImageSlider (component and module) is installed in your Joomla! website.
- \* BJ! List Menu module is installed in your Joomla! website.
- \* BJ! News Tabber module is installed in your Joomla! website.
- On Joomla 1.5, you could click install sample link after finishing the installation.
- On Joomla 1.0.x, please go to these steps to do the installation sample data:
  - + Run sampleData.sql ONLY on fresh installation of Joomla!
  - + Copy sample images in folder samples (all directory bj\_imageslider) into [root]/images/stories folder
